THE

VECTOR

STUDY

Have you experienced a traumatic head injury or whiplash which has led to persistent headaches?

The VECTOR research study is for adults between the ages of 18 and 70 who have been diagnosed with PPTH (persistent post-traumatic headaches) following a traumatic head injury or whiplash.

The purpose of this study is to test the effectiveness of an investigational medication in adults with PPTH.

You may qualify if you:

- **Are between the ages of 18 and 70**
- **Have experienced a traumatic head injury or whiplash**
- **Have been diagnosed with PPTH (Persistent Post-Traumatic Headaches)**

Study staff will determine eligibility based on additional study criteria.

**For more information,
talk to your doctor.**
